Assigning Printers

Q. Will Wintix Version 5 remember the previous print settings so I don't have to keep selecting the printer each time, as this wastes time and is cumbersome?

A. You need to assign printers.

- Make the report printer to be the default printer (under Windows).
- For tickets, labels and receipts, modify the form. Then, modify a format. Click on File | Page setup | Page setup.
- Select the printer and paper size and orientation.
- Save the settings and test the printing.
